## – Bloom (Questions)

---

Kai Lawonn

# Possible Questions

What is the bloom effect?

# Possible Questions

What is the bloom effect?

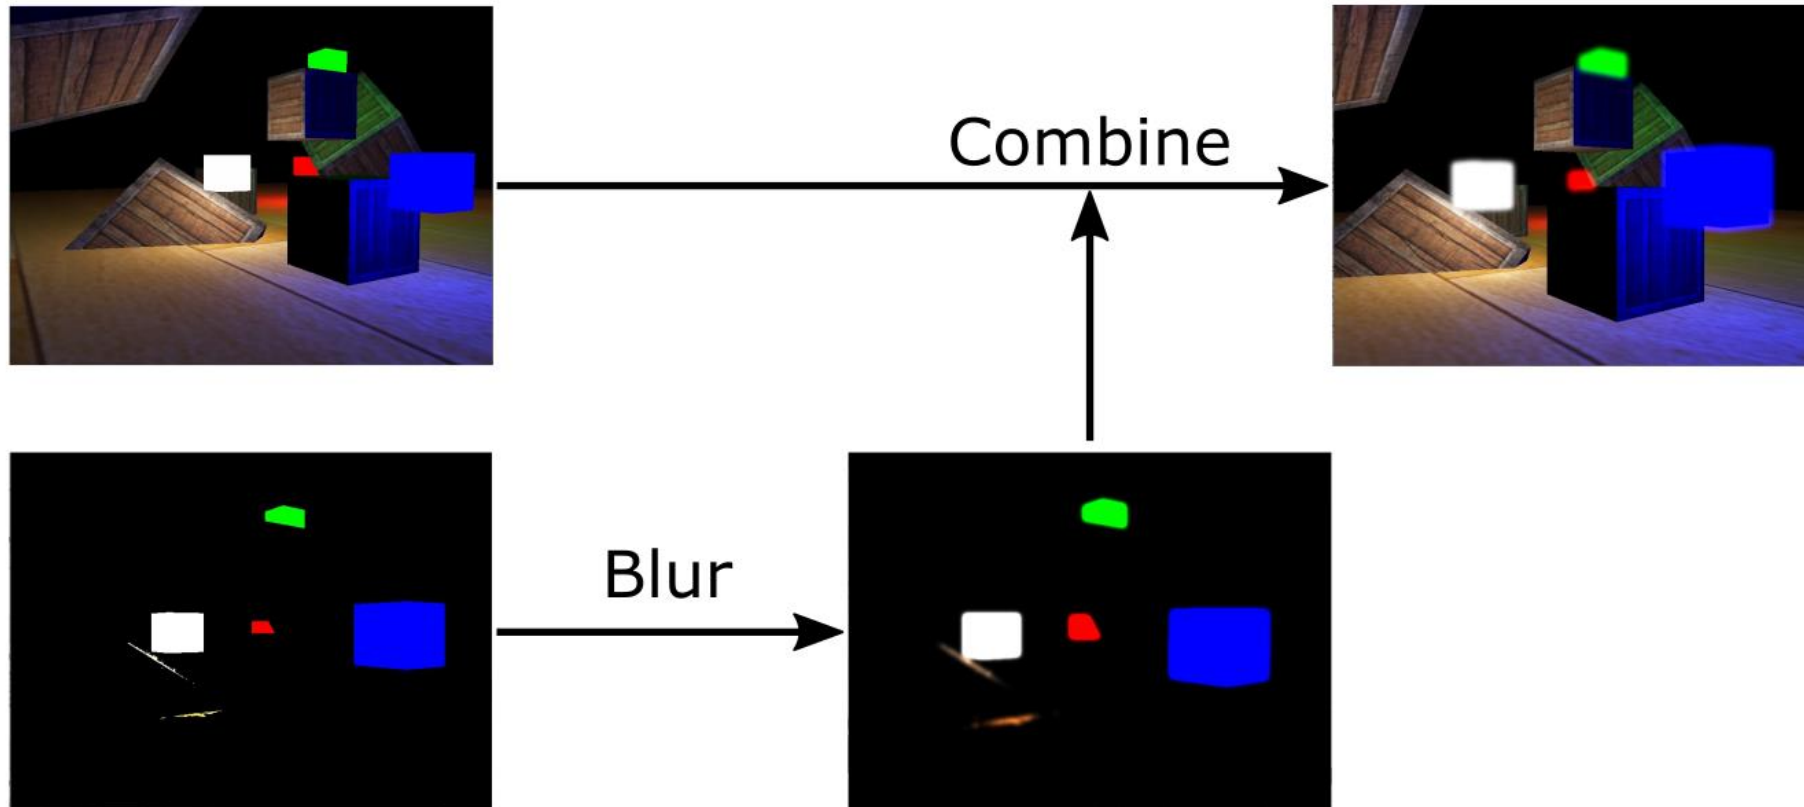

- Light sources glow (light bleeds around the light source) → gives the viewer the illusion these light sources or bright regions are intensely bright

# Possible Questions

Explain the steps to achieve a bloom effect.

# Possible Questions

Explain the steps to achieve a bloom effect.

# Possible Questions

What are Multiple Render Targets?

# Possible Questions

What are Multiple Render Targets?

They allow to specify more than one fragment shader output (extract two images in a single render pass)
